Reference Letter

I confirm that Jakub Stapiński created the website for my project Silesia Creativity.

Jakub handled all aspects of the work. He built the website from scratch, set up a system for publishing articles, and made sure the site was visible in search engines. He also came up with clever solutions that helped save on hosting costs, for example by using external services to store videos.

The collaboration went very well. Jakub explained everything in plain language and responded quickly to my feedback. The website runs smoothly and is easy to manage.

I recommend Jakub as someone who can handle a web project comprehensively and tailor solutions to client needs.
